

Sound Spheres Exercise

1. Download the Google Street View app
2. Choose the camera icon in the bottom right, and then click on Camera
3. Find a good 360 location, and point the camera at the orange dot until the orange check / circle becomes green.
4. Choose the 360 image, and then tap it, and choose the orange download button. Choose Share Privately and then save the image to your camera roll
5. Use an app to record audio narration of that site. You may need to go indoors or to a quieter place, so there is no wind or distractions. You may need to write down a script. The final audio track must be at least 1 minute long.
6. Edit the audio in iMovie, and export it by going to File...Share...File. Choose Audio only, and then choose File Format: MP3.
7. Go to storyospheres.com, and click Create Your Story Sphere. Give it a title and description, and accept the terms and conditions.
8. Upload the 360 image from your phone, and choose Next.
9. Upload the mp3 file from your computer, and choose Next. Then press Save
10. Preview it, and then Share it to our class page on Facebook by clicking the Facebook icon, then choose Share in a Group. Then search for our Virtual Reality & 360 Video group. You can also download / embed the Sphere to a website if you would like.
